

NOTRE-DAME-DE-FATIMA CENTRE

FOOD RESTRICTIONS

DAYCAMP

The management of the Notre-Dame-de-Fatima Centre, for obvious health and safety reasons, has opted for the systematic refusal of any participant registration to the food services who has food allergies (and not intolerances). The child must bring his own lunch, there is no microwave available at the Centre daycamp.

SUMMER CAMP, RESPITES AND GROUP ACCOMMODATION

Anyone suffering from food allergies must inform the team at the Centre with the Registration form for summer camp and respites or confirmation form for group accommodation.

It is permitted to bring one's own meal and a microwave will be at the client's disposal. However, we recommend that participants in those groups do not consume anything coming from our food services. The responsibility lies with the group leaders as they are informed of this particular policy.

Please note that we can adapt our meals to be vegetarian, without gluten, vegan/without lactose with pre-established menu choices done by our Chef.

RELEASE OF LIABILITY

Despite all precautions taken by the management team at the Fatima Centre, it is impossible to guarantee beyond doubt that there is a complete absence of allergen considering:

- There is infinite presence of allergens in the acquired goods from our suppliers and they cannot guarantee the total absence of allergens.
- The variety of allergens of any kind is more and more prevalent.
- The team at the Centre cannot control the contents of the lunches coming from outside.
- Several hundred of people can be welcomed at the Centre at the same time.
