

Overview of measures related to COVID-19

2021 Summer – Centre Notre-Dame-de-Fatima

This document briefly presents an overview of measures put in place by our team for 2021 day camp. These measures are based on 4 indicators given by the Association des camps du Québec and the Public Health General Management.

For more information, we invite you to watch our information video produced by our team.

<p>Physical distancing</p> 	<p>There are now 3 arrival zones, divided by age groups, allowing to maintain the distancing between the campers.</p> <p>The daycare service was thought differently to lower the number of children present in the same zone. Ratios during daycare are the same as during the day camp.</p> <p>Procedures for the swimming pool have been revised to respect sanitary measures recommended by Public Health.</p>
<p>Outdoor activities</p> 	<p>All day long, the camp will be outside, even during lunch time.</p> <p>In case of bad weather, a local will be assigned for each group, while maintaining sanitary measures and physical distancing.</p>
<p>Limitating physical contacts</p> 	<p>Specialized activity areas have been reimagined to ensure activities with the less contact possible.</p> <p>Many activities without contact have been created by our animation team.</p>
<p>Hygiene measures</p> 	<p>Animations to promote the practice of respiratory hygiene/cough etiquette will be done every Monday.</p> <p>Washing hands is mandatory at the arrival at camp and many times during the day (snack time, lunch, bathroom, activities, etc.).</p> <p>Sanitary stations were added all over the site allowing disinfection of material and surfaces by the monitors after each activity.</p> <p>Monitors and employees of the Center will wear adequate individual protection equipment when necessary. For the children, we are waiting for the instructions of Public Health in the months to come.</p>

*Measures will be revised according to the documents given by DGSP and ACQ before camp starts.
