

Overview of measures related to COVID-19

2021 Summer – Chêne-Bleu day camp (operated by Centre Notre-Dame-de-Fatima)

This document briefly presents an overview of measures put in place by our team for 2021 day camp. These measures are based on 4 indicators given by the Association des camps du Québec and the Public Health General Management.

<p>Physical distancing</p> 	<p>Arrivals and departures will be at the side door where is the access of the library . Do not use the main school door.</p> <p>Remember to keep a distance of 2 meters from other people at all times. It is strongly recommended for adults to wear a face cover at all times when arriving and departing at the day camp, even if we are outside as it can be complex to respect the distance while waiting.</p> <p>The daycare service was thought differently to lower the number of children present in the same zone. There is no more distancing between children of the same group.</p>
<p>Outdoor activities</p> 	<p>All day long, the camp will be outside, even during lunch time.</p> <p>In case of bad weather, a local will be assigned for each group, while maintaining sanitary measures and physical distancing.</p> <p>Procedures for the swimming pool have been revised to respect sanitary measures recommended by Public Health.</p>
<p>Limitating physical contacts</p> 	<p>Activity areas have been reimagined to ensure activities with the less contact possible between groups.</p> <p>Many activities without contact have been created by our animation team.</p>
<p>Hygiene measures</p> 	<p>Wearing a mask, inside or outside, is no longer required for children since we are now in a green zone.</p> <p>Monitors and employees of the Center will wear adequate individual protection equipment when needed according to the CNESST rules.</p> <p>Washing hands is mandatory at the arrival at camp and many times during the day (snack time, lunch, bathroom, activities, etc.).</p>

*Measures will be revised according to the documents given by DGSP and ACQ during the summer.
